PAPILLION OPAQUE

Papillion refers to the French word for butterflies "Papillion".

The lamp consists of 6 illuminating lampshades, each elegantly positioned in a lightweight metal construction, which together forms the shape of a hexagon.

The floating lampshades reflect the direct light towards the ceiling, and filter indirect light towards the space underneath. The 6 arms are mounted to a rifflered center piece, adding a shimmering and reflective quality to the lamp.

Papillion comes in an oxidized version with lampshades of white opal glass, which creates a warm and cozy lighting. Papillion also comes in a brass with perforated lampshades, which filter the light through every little hole in the perforated lampshade.
