## PIVOT TABLE LAMP

Pivot is a simple and yet refined lamp design, that gives the user the ability to project light on a certain object or space. Pivot can be used to highlight all kinds of objects, such as art pieces, sculptures, flowers, and plants. Pivot can also be used to create a warm and inviting atmosphere in the room, and especially to play with the contrast between light and shadows.

Pivot consists of a rotating aluminum lampshade, mounted directly to a square shaped Iron base. Both objects are designed with precision to fit each other and enable the lampshade to rotate smoothly. The lamp is plated in a brushed bronze color, to create a warm and inviting light.

Pivot is the French word of an object turning around its own axe or center point.
