HANDLING LUXURY SINCE 1942

At Quincalux we have been inspiring Architecture with Craftsmanship since 1942. For eighty years we have been blending tradition and innovation, made by hand in Belgium, with a never-ending search for improving techniques. Driven by quality, we solely craft our door handles into timeless designs with noble materials such as brass and aluminium as these age perfectly and are sustainable, a characteristics which we keep close to heart. Today, our product range extends in two directions : a traditional Classic Collection and an innovative Contemporary Collection.

Chez Quincalux, nous inspirons l'architecture par notre savoir-faire artisanal depuis 1942. Depuis quatre-vingts ans, nous allions tradition et innovation, fabrication à la main en Belgique et recherche permanente d'optimisation de nos techniques. Passionnés par la qualité, nous réalisons uniquement des poignées de porte au design intemporel avec des matériaux nobles tels que le laiton et l'aluminium, qui vieillissent parfaitement et sont durables, un aspect qui nous tient particulièrement à cœur. Aujourd'hui, notre gamme de produits est axée vers deux directions : une collection classique traditionnelle et une collection contemporaine placée sous le signe de l'innovation.

Photography: Kristof Delbart

Four generations of Belgian craftsmanship

Design and craftsmanship, hand-made in Belgium. Quincalux guarantees traditional craftsmanship with modern technological ingenuity. Every part turned, milled hot-pressed or cast in a sand bed is considered and detailed with care and passion for the craft. From the crank pin to the adjusting bolt; from the groove to the handle, it is always the result of a meticulous design and production process. Cutting-edge innovative technology helps polish the true métier, but the hand always comes first at Quincalux. The knowledge is at hand and passed on from generation to generation. Every new product created by designers for architects always passes through many hands.

That's what it's always meant for.

Quatre générations d'artisanat belge

Design et artisanat, fabrication à la main en Belgique. Quincalux garantit un artisanat traditionnel combiné à l'ingéniosité technologique moderne. Chaque pièce tournée, fraisée, pressée à chaud ou coulée dans un lit de sable est manipulée et détaillée avec soin et passion pour le métier. Du maneton à la vis de réglage, de la rainure à la poignée, le processus de conception et de production est toujours appliqué dans le souci du détail. Une technologie innovante de pointe soutient le vrai métier, mais Quincalux privilégie toujours le travail à la main. Notre savoir spécifique se transmet de génération en génération. Chaque nouveau produit créé par des designers pour des architectes passe toujours par plusieurs mains avant validation.

L'objectif pour lequel il est initialement conçu.

Design Driven

Quincalux is proud to work with internationally reknowned designers, architects and interior architects for the creation of their new collections.

They are supported by the internal development team and the creative director, Frederik Delbart.

Axé sur le design

Quincalux collabore avec des designers, des architectes et des architectes d'intérieur à la renommée internationale pour la création de ses nouvelles collections.

Ils sont soutenus par l'équipe de développement interne et par le directeur créatif, Frederik Delbart.

Imperial

FREDERIK DELBART

Creative Director
& Designer

Frederik Delbart's interdisciplinary approach includes product design as well as strategic design management and creative direction. After his studies at La Cambre Arts Visuels, his career took off. This is demonstrated by numerous product introductions, several awards as well as long-term strategic partnerships with companies such as Quincalux. Since 2015, he has been active as Creative Director for Quincalux, collaborating closely with the direction and setting the lines for future strategy, collections and branding and bringing the company's brand to the next level. In 2018, Delbart was awarded the prestigious title of 'Belgian Designer of the Year'. He's internationally acclaimed for his thoughtful design philosophy, in which nothing is left to chance. From concept to design and from use of materials over production process to implementation, marketing and branding, even the subsequent logistics chain does not escape his attention. The collections from his hand are Caracas, Quito, Oslo, Royal, Imperial, Copenhagen, Athena, Kyoto and Osaka.

L'approche interdisciplinaire de Frederik Delbart comprend le design de produits ainsi que la gestion stratégique du design et une direction créative. Après ses études à La Cambre Arts Visuels, sa carrière a pris son envol. En témoignent de nombreuses introductions de produits, plusieurs prix ainsi que des partenariats stratégiques à long terme avec des entreprises telles que Quincalux. Depuis 2015, il endosse le rôle de directeur créatif pour Quincalux, en étroite collaboration avec la direction. Il établit la stratégie, les collections et le branding, et élève la marque de l'entreprise à un niveau supérieur. En 2018, Frederik Delbart s'est vu attribuer le prestigieux titre de Designer belge de l'année. Il est également reconnu au niveau international pour sa philosophie de conception réfléchie, dans laquelle rien n'est laissé au hasard. Du concept au design et de l'utilisation des matériaux au processus de production en passant par la mise en œuvre, le marketing et le branding, même la chaîne logistique ultérieure n'échappe pas à son attention. Il a notamment conçu les collections Caracas, Quito, Oslo, Royal, Imperial, Copenhagen, Athena, Kyoto et Osaka.

Helsinki

JEFFREY HUYGHE

Designer

www.jeffreyhuyghe.com

Jeffrey Huyghe graduated as an industrial product designer at Howest, Kortrijk. With a heart for engineering, Jeffrey likes to experiment with geometrical shapes and dynamic interactions. This translates in an interesting tension where minimalism and materialisation meet state-of-the-art engineering.

Examples are multi-awarded architectural lighting designs like Semih (2016) and Marbul (2018) where complex hidden rotational systems are disguised as pure designs. Recently he started his own studio where, beyond lighting, he can push further the boundaries of the interaction between materials and mechanics. The new Helsinki Collection was designed by Jeffrey Huyghe.

Jeffrey Huyghe est diplômé en tant que designer de produits industriels à Howest, Courtrai. Avec un cœur pour l'ingénierie, Jeffrey aime expérimenter les formes géométriques et les interactions dynamiques. Cela se traduit par une tension intéressante où minimalisme et matérialisation rencontrent une ingénierie de pointe.

Des exemples sont des conceptions d'éclairage architecturales multi-primées comme Semih (2016) et Marbul (2018) où des systèmes de rotation cachés complexes sont déguisés en conceptions pures. Il a récemment créé son propre studio où, au-delà de l'éclairage, il peut repousser les limites de l'interaction entre les matériaux et la mécanique. La toute nouvelle collection Helsinki a été conçue par Jeffrey Huyghe.

Como

LIEVEN MUSSCHOOT & CAS MOOR

Designers

Interior architect Lieven Musschoot has an impressive track record in the field of hospitality projects. In the many trendy bars and acclaimed restaurants, he always manages to add a new dimension to the concept of 'tasteful design'. No detail goes unnoticed.

Since 2014 he has also been reinforced by Cas Moor, a pur sang product designer. Together the duo develops complete projects, from interiors to custom lighting, furniture and accessories.

LMCM designed the Como collection for Quincalux, in which you can experience the grandeur of the famous Alpine lake.

L'architecte d'intérieur Lieven Musschoot peut se targuer de posséder un palmarès impressionnant dans le domaine des projets d'accueil. Mieux que quiconque, il sait toujours ajouter une nouvelle dimension au concept de « design de bon goût » dans les nombreux bars branchés et restaurants de renom. Aucun détail ne passe inaperçu.

En 2014, il a été rejoint par Cas Moor, un designer de produits pure souche. Ensemble, le duo développe des projets complets, des intérieurs aux luminaires sur mesure, en passant par le mobilier et les accessoires.

LMCM a conçu la collection Como pour Quincalux, qui respire la grandeur du célèbre lac alpin.

Palma

JULIEN RENAULT

Designer

Julien Renault grew up outside Paris and attended design schools both in France (Reims School of Art and Design) and in Switzerland (ECAL). Two different cultures and approaches to design which have partly shaped Renault's own way of addressing his work. On the one hand artistic, free and personal, on the other hand systemic, objective and rational. Renault uses both pragmatism and intuition when he dives into a new project, creating a dialogue between sense and sensibility. The cross-disciplinary output is suitable for a designer such as Renault who is grounded in his vision of essentialism. Behind each apparently plain project lurks a bunch of well-considered references and the mindset of a designer who leaves nothing to chance. Renault thinks and works conceptually and throughout each project follows a precise and recognisable image. Whether the assignment is a product design, a photo shoot or an interior space, it starts with a defining element which accompanies the concept from start to finish.

For Quincalux he created the Palma Collection in which he sublimates the lines of a palm into an elegant door and window handle.

Julien Renault a grandi en région parisienne et a fréquenté des écoles de design en France (École Supérieure d'Art et de Design de Reims) et en Suisse (ECAL), deux cultures et deux approches différentes du design qui ont contribué à façonner la manière dont Renault aborde son travail. D'un côté artistique, libre et personnel, de l'autre systémique, objectif et rationnel. Renault se sert de son pragmatisme et de son intuition lorsqu'il se plonge dans un nouveau projet, créant ainsi un dialogue entre le sens et la sensibilité. Cette approche interdisciplinaire convient à un designer tel que Renault, ancré dans sa vision de l'essentiel. Derrière chaque projet en apparence banal se cache un ensemble de références réfléchies et l'état d'esprit d'un designer qui ne laisse rien au hasard. Renault pense et travaille de manière conceptuelle et chaque projet suit une image précise et reconnaissable. Qu'il s'agisse d'un design de produit, d'une séance photo ou d'un espace intérieur, tout commence par un élément déterminant qui accompagne le concept de A à Z. Il a créé pour Quincalux la collection Palma, qui sublime les lignes d'un palmier en une élégante poignée de porte et de fenêtre.

Copenhagen

Contemporary Collection

2022 - 2023

The innovative and refined experience of modern architecture.

L'expérience innovante et raffinée de l'architecture moderne.

A photograph of a classic interior space. The floor is made of light-colored wood planks arranged in a herringbone pattern. The walls are painted in a light beige color and feature white paneling. On the left, there is a white door with a glass panel and a gold handle. In the center, there is a vanity unit with a dark, marbled top and a matching cabinet below. To the right, there is a doorway leading to another room where a chair is visible. A large window with a grid pattern is on the far right.

Imperial

A close-up photograph of a dark, textured wooden door. A gold-colored door handle is mounted on the right side. The handle features a circular rose and a long, low-profile lever with a faceted, geometric design. The lighting highlights the metallic texture and the grain of the wood.

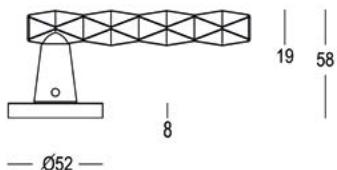

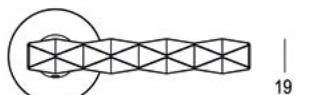

Imperial

Design by Frederik Delbart

The Imperial Collection captures the light with its many facets while respecting ergonomics. Uniting the extended know-how of Quincalux with avant-gardist innovative design, the Imperial Collection is crafted in solid brass with extreme precision.

La Collection Imperial capte la lumière avec ses multiples facettes tout en respectant l'ergonomie. Alliant le solide savoir-faire de Quincalux à un design novateur avant-gardiste, la Collection Imperial est réalisée en laiton massif avec une extrême précision.

Luxor

The name of this handle clearly refers to a typical Egyptian structure; the seizable part of the handle having a pyramidal shape.

Le nom de cette poignée fait clairement référence à une structure typiquement égyptienne, avec sa prise de main de forme pyramidale.

Material: Brass/Laiton DIN 17166

Lisbon

Starting with a round rose, followed by a smoothly bended rounded off handle.
Resulting in an elegant and ergonomic handle.

Commençant par une rose ronde, suivie d'une poignée arrondie et délicatement courbée, elle donne vie à une élégante poignée ergonomique.

Material: Brass/Laiton DIN 17166

Brussels

The '124' collection was created by Quincalux in 1965, 130 years after the inauguration of the first European railway between Brussels and Mechelen. The inspiration came from the hardware designed for the interiors of the famous Orient Express, produced by the Belgian company CIWL.

La collection « 124 » a été créée par Quincalux en 1965, 130 ans après l'inauguration du premier chemin de fer continental, entre Bruxelles et Malines. Toutefois, elle puise son inspiration de la quincaillerie conçue pour le célèbre Orient Express, produite par la société belge CIWL.
